Arcam AV-9

Widely acclaimed as one of the best surround processors in the world, the AV9 is among the few to deliver totally convincing performance on both movies *and* music.

Price \$5,999.00
AV-9

Arcam C-31

The new C31 Preamplifier incorporates such advanced features as hermetically sealed reed relay input switching and Arcam's Mask of Silence (MOS) technologies to deliver a significant advancement in two-channel audio performance.

Price \$1,599.00
C-31

Arcam P-7

The perfect companion to the AV9, this seven-channel power amp employs massive dual 1.5 kilowatt toroidal transformers to deliver enough power for the most demanding movies and yet is still capable of the high-resolution musical performance which has long been Arcam's forte.

Price: \$4,899.00
P-7

Arcam DIVA AVR-250

The AVR250 is the natural successor to the well-established AVR200 receiver. Benefiting from the development groundwork of the AVR300, the AVR250 has an entirely different platform. The most significant difference of the new model is the addition of two extra channels for enhanced surround sound operation.

Price: \$1,599.00
AVR-250

Price: \$5,999.00
AV-9

Arcam AV-9

Widely acclaimed as one of the best surround processors in the world, the AV9 is among the few to deliver totally convincing performance on both movies *and* music.

Arcam DIVA AVR 350

The AVR350 is Arcam's highest performing receiver to date. Built for movies and tuned for music, this exciting new 7.1 channel home cinema receiver includes 2-way HDMI switching and 7 x 100 wpc real world power.

Price: \$2,749.00
AVR-350

Arcam DIVA AVR-300

The AVR300 represents another landmark project by Arcam in its quest to deliver products that provide discerning customers with home cinema solutions, which don't involve the compromises seen in many other products.

Price: \$1,699.00
AVR-300

Arcam AVP-700

The AVP700 builds on Arcam's impressive history as a leader in high performance AV products and together with its natural partner, the new P1000 power amplifier, allows a truly spectacular multichannel sound system to be created.

Price \$ 2,299.00
AVP-700

Arcam P-1000

Using seven precisely matched channel modules, the P1000 can deliver a clean yet dynamic sound ensuring consistency from the quietest whisper to the loudest explosion.

Price: \$2299.00
P-1000

The word 'OUTSTANDING' in a large, bold, blue font with a white outline, set against a background of a stylized pyramid with red and black segments.The ARCAM logo, featuring the word 'ARCAM' in a large, bold, white font, with the tagline 'Bringing music and movies to life' in a smaller font below it, all on a dark green background.

Arcam DIVA AVR-350

The **AVR350** is the best ever sounding receiver from Arcam, delivering real audiophile sound quality for movies and music, with two-way HDMI switching plus HDTV compatible component / RGB switching, producing 7 x 100 watts per channel power output (all channels driven simultaneously) real world power, rare in a receiver, and a second room/zone output with audio and video plus RS232 for system control and install integration. Audio performance is outstanding with digital or analogue inputs presenting an immersive listening experience from any source.

Price \$2,749.00
AVR-350

**Yamaha RXV-2700**

Offers the highest levels of sound and video quality and convenience for total home theater enjoyment. Features 1080p compatible HDMI, up-scaling, iPod compatibility, XM Satellite Radio Ready, upgraded CINEMA DSP programs, and zone control and Network Receiver functions.

Sherbourn

Price: \$ 3,500.00
7/2100 7-Channel Amp

7/2100A 7-Channel Amplifier

Sherbourn is the name of choice when seeking an amplifier with awesome power and unlimited capability. With the knowledge that these units aren't always hidden in a generic equipment rack, we charged our industrial designers with the task of creating an elegant chassis that will harmonize with the finest home theaters. Stunning and Sophisticated.

7/1250A 7-Channel Amplifier

The 7/1250A is a generation-two version of the original 7/2100A amplifier that addresses a market segment that wants the capability of a seven channel amplifier but does not necessarily need the excess power and heft that a 7 transformer model offers.

Price: \$ 2,000.00
7/1250 Amp

Price: \$ 2,750.00
5/5210A Amp

5/5210A 5-Channel Amplifier

Sherbourn is the name of choice when seeking an amplifier with awesome power and unlimited capability. With the knowledge that these units aren't always hidden in a generic equipment rack, we charged our industrial designers with the task of creating an elegant chassis that will harmonize with the finest home theaters.

PT-7010A Pre Processor

2 zone 7.1 Pre-amp/Processor/Tuner plus amplifiers with 5 or 7 channels of 100 watts, 125 watts, or 200 watts - all channels driven.

Price: \$ 3,000.00
PT-7010A Pre-Pro

Price \$2,100.00
LDS 12/900

LDS 12/900 12-Channel Amplifier

This 6-zone amplifier is housed in the same elegant rack-mountable chassis as Sherbourn's other high output amplifiers. Each zone can handle 2 pairs of 8-ohm speakers with a rated output of 100/150 watts into 8/4-ohms respectively. The musical performance remains superb thanks to the continued use of discrete bi-polar transistors, big capacitors, hefty multi tap toroidal transformers and large heat-sinks

LDS 16/45 16-Channel Amplifier

The elegant rack-mountable LDS 16/45 16-channel amplifier offers 80 watts of smooth, articulate power from each of eight zones. Included on the rear panel are RCA inputs for eight zones and a bussing system when zones share the same input, plus music signal sensing switches, & gain control

Price: \$2500.00
LDS 16/45

Price: \$ 450.00
LDS 2/150

2/150 2-Channel Amplifier

The 2/150 outputs 2 x 50 watts of 8-ohm power to as many as 2 pairs of 8-ohm speakers or 2 x 75 watts into a 4-ohm load. In addition to these impressive specs, the 2/150 can be bridged into an 8-ohm mono output of 130 watts.

2/75 2-Channel Amplifier

This elegant LDS 2-75 two-channel amplifier outputs an accurate performance of 100/150 watts into 8/4 ohms. Its design enables a simple integration into a whole house system and utilizes speakers that are ordinarily used for the same room's music. Discrete transistors, a large toroidal transformer and innovative circuitry combine to deliver performance, value and reliability.

Price: \$ 400.00
LDS 2/75

C-12 Cooling Fan

In an age of inconspicuous consumption, where more and more electronic installations are being concealed in cabinets or cupboards, heat has become a major factor. Heat is the enemy of all electronic components and is a major Contributor to poor reliability. The C12 cooling unit is designed to permit multiple configurations for pointing the cool air emanating from its three thermally governed fans into any direction.

Price: \$ 450.00
C-12 Cooling Fan

TST 200-4 2-Channel Amplifier

Similar to the TST2/200, this smooth and articulate 200 watt amplifier uses Thermal Shift Technology™ for driving multiple pairs of speakers. . Four pairs of speaker connectors are linked to four zone buttons to negate the need for a cumbersome speaker selection box. Optional rackmount ears are available

Price: \$ 800.00
TST 2/2000-4

R1250MC 12-channel amplifier

The R1250MC provides an array of useful features such as autosensing line inputs, bridged mono operation, independent zone triggering, bus inputs and multiple speaker outputs per zone to meet a wide variety of applications and configurations.

Price: \$ 1,499.00
R1250MC

R850MC 8-channel amplifier

The Russound R850MC is an 8-channel power amplifier ideal for use as the main amplifier in home theater and distributed audio systems. The eight channels are arranged in pairs to provide amplification for four stereo zones

Price: \$ 1,099.00

RGPC 1200 C Custom

RGPC 1200 C Custom

Housed in a drop dead gorgeous art-deco chassis, the 1200 Custom is rack mountable right out of the box. It is now a full three rack heights and ships complete with rack ears. The 1200 Custom provides twice the power-on-demand than the RGPC 400 Pro or 600s and sports 12 Hubbell outlets to accommodate a serious amount of gear. The 1200 Custom also enjoys the state of the art, dual stage surge suppression system and removes over 40dB of noise, while providing of 12,000 Watts of high-current-on-demand to supply more power when demand outstrips supply of stiff AC power. It comes equipped with a heavy, 12 gauge, 6ft power cord and has twin 20 Amp fast blow fuses for added protection. Available in anodized aluminum (Silver) or black face plates.

Richard Grays Power Company 600 Pro

RGPC 600S

Offering all the same striking good looks and benefits of the larger RGPC 1200 Custom at a more attractive price, the RGPC 600S is perfect for the more budget conscious audio/video enthusiast with a smaller system.

Like both of its counterparts (400 Pro and 1200 Custom) the RGPC 600S' patented parallel, non-current-limiting technology in effect moves the power from the utility company transformer on the street and places it next to your equipment, eliminating power drains that detract from a systems ability to accurately reproduce audio and video to its fullest performance potential.

Price: \$ 799.00
RGPC 600S

Richard Grays Power Company 400Pro

RGPC 400 Pro is housed in a rectangular shaped commercial metal box designed to be placed next to the components needing line enhancement. It features 4 Hubbell AC outlets, has 12 gauge internal wiring, surge protection system, and now has a 6 ft. 12 gauge power cord with a 20 amp IEC Connector and 20 amp fast blow fuse. Depending upon the number of dedicated AC circuits feeding the system, they are ideal for placing multiple units star-clustered next to power amplifiers, preamp and front-end audio and video components, and to power overhead video projectors. A major advantage of RGPC's technology is that just one unit placed on a circuit will offer line enhancement to any other components plugged into the same circuit; the closer the RGPC to the component the more effective it becomes.

Prestige Loudspeaker

Tannoy is renowned throughout the world for the Prestige Loudspeaker range. This outstanding collection of loudspeakers includes the famous Westminster Royal HE and many other models that serious audiophiles aspire to.

All Prestige loudspeaker systems use point source technology Tannoy Dual Concentric™ drive units. All of which are meticulously hand crafted in a substantial die cast frame.

Each of the speakers feature cabinets finished with selected walnut veneers and solid walnut mouldings.

MAIN FEATURES

Combining the best of bespoke cabinet making with the latest production and acoustic design skills has constantly been the hallmark of the long-running Tannoy Prestige range. Always utilizing the format of a solitary Tannoy Dual Concentric™ drive unit, the Prestige range is acclaimed by audiophile enthusiasts around the globe as embodying all that is essential in a classic Tannoy loudspeaker. The latest version coincident point source Dual Concentric™ uses a specially designed twin-roll impregnated fabric roll surround on the drive unit's cone, ensuring that midrange purity and detail is combined with tight, controlled bass.

Tannoy has added three new models to this uniquely styled loudspeaker range; Sandringham, Kensington & Yorkminster.

Each of the traditional style cabinets employ real wood veneered 18mm birch ply panels and solid hardwood mouldings, which are hand polished to a standard that is unsurpassed. Extensive internal bracing and damping is utilised to reduce colouration, augment the midrange detail, and improve speed and clarity of the bass. Low frequency alignment is managed through the Tannoy Distributed Port System (DPS).

Autograph Mini

Remaining true to the cabinet build and finish quality of that yesteryear model, the Autograph Mini naturally incorporates a Dual Concentric™ driver – the unique engineering statement that makes this speaker a ‘real’ Tannoy. Incorporating wide bandwidth technology to ensure breathtaking performance from a unit measuring just 4” in diameter, this is the smallest ‘Dual’ ever manufactured. And following in the footsteps of its proven heritage the driver utilises a heavy cast alloy frame and multi fibre paper pulp cone. Delivering natural midrange and well defined bass, the traditional but high tech cone material also ensures subtlety with stunning detail and expansive imaging.

A key component of the Autograph Mini is the titanium diaphragm high frequency unit is positioned on the same axis as the bass section. Fitted with a neodymium magnet system to deliver a smooth response up to an incredible 54kHz, this key component in the Autograph Mini enhances the loudspeaker’s strikingly true to life performance. Ensuring complete signal path integrity, 99.99% high purity silver cable is used to connect the tweeter to the system’s minimalist crossover network – a thoroughbred audiophile component in itself that includes low loss inductors and specially damped

audio grade capacitors.

High density birch ply with hardwood veneers and solid hardwood mouldings are utilised in the unique and chic design of the hand finished cabinet. As with its erstwhile and larger predecessor, authentic oatmeal coloured grille cloth is used to conceal the driver and is also inlaid within the angled sides towards the front of the miniature hexagonal cabinet. A high performance loudspeaker designed for the discerning fashion conscious.

The Autograph mini is a hugely scaled-down but authentic version of a loudspeaker that was famous throughout the audio world fifty years ago. Reduced to a fraction of the size of the immense and revered original Tannoy Autograph this exquisite replica is the ultimate modern retro audio product. Its diminutive size and accurately detailed finish produce a modern day classic that will embellish the most contemporary surroundings.

Teak Veneer

Sterling SE

A compact floor-standing speaker that uses a 10" (254mm) Tannoy Dual Concentric™ in a cabinet design optimised to produce bass performance with superb control and extension, allied to spacious, fluid mid-range and high frequencies of great purity and detail. The cohesion of the stereo sound staging reproduced by the Stirling SE, a characteristic common to all the Dual Concentric™ equipped Prestige models, is involving and believable, delivering remarkable spaciousness and presentational stability in equal measure.

High frequency sound radiates from the centre of the low frequency unit through a carefully designed high frequency exponential horn. With the HF unit mounted behind and concentrically with the LF unit, low and high frequency sound radiation

is generated on the same axis and is therefore fully integrated at source. A 'hard edge' cone surround and unique chassis earthing system deliver tight, fast and controlled bass with fluid and transparent midrange and high frequency performance of great purity.

The internal components are hard wired with Van den Hul MC CS18 halogen free silver plated cable throughout. High quality crossover components, such as ICW ClarityCaps, high quality metalised film capacitors and very low loss iron core inductors, have all been carefully arranged to avoid any coupling effects.

A round five-point (bi-wire and ground point) terminal panel uses high quality gold plated connectors to ensure easier connection of substantial loudspeaker cable whilst maintaining complete signal path integrity

Extensive internal bracing of the already rigid enclosure of the Stirling SE further strengthens the construction and reduces colouration, enhancing the midrange detail and the speed and clarity of the bass; resulting in a compact speaker with an open and detailed

Kensington

The Kensington utilizes a 10" version of the Dual Concentric™ fitted with an Alcomax 3 magnet system. This rare earth magnet system design endows the Dual Concentric™ drive unit with an exceptional transient response and greatly increased sensitivity.

Price: \$ 5,050.00 each
Kensington
Lacquered Mahogany

Canterbury HE

The 15" (380mm) version of the Tannoy Dual Concentric™ drive unit in the Canterbury 15 SE is equipped with an Alcomax 3 magnet system and the Tannoy PepperPot Wave Guide™ to further enhance the point source symmetrical dispersion properties of the driver. High frequency sound radiates from the centre of the low frequency unit through a carefully designed high frequency exponential horn. With the HF unit mounted behind and concentrically with the LF unit, low and high frequency sound radiation is generated on the same axis and is therefore fully integrated at source. A 'hard edge' cone surround and unique chassis earthing system deliver tight, fast and controlled bass with fluid and transparent midrange and high frequency performance of great purity.

Acoustically this speaker delivers a superbly dynamic overall presentation with fast, accurate bass, fluid and open midrange and clean, spacious high frequencies – an exceptionally involving performance. With such impressive

performance available the useful addition of a Variable Distributed Port System allows low frequency output to be tuned to suit any room dimension.

The crossovers are hard-wired throughout with 99.9999% purity 6N copper Acrolink® cable; the routing of which has been painstakingly considered to ensure there is no degradation in sound quality. Similarly, the exceptionally high quality components, such as Hovland Musicaps®, ICW Musicaps, Vishay thick film non-inductive resistors and very low loss iron core inductors, have all been carefully arranged to avoid any coupling effects.

Incredible transparency in the mid band, exceptional dynamics, speed, focus, timbre accuracy, depth of field, and true inter-transient silence has been achieved; all of which provides an enhanced true-to-life vocal clarity and instrumentation.

A round five-point (bi-wire and ground point) terminal panel uses high quality WBT™ connectors to ensure easier connection of substantial loudspeaker cable whilst maintaining complete signal path integrity

The timeless beauty of the oiled walnut veneer exterior finish, with its hand selected burr walnut inlays and solid walnut mouldings, ensures that these audiophile loudspeakers are undoubtedly destined to become true family heirlooms.

Price: \$ 7,390.00 each
Canterbury HE
Oiled Walnut

Westminster Royal SE

The Westminster Royal SE, the crowning achievement of the Prestige range, combines hand built traditional compound horn loaded enclosure with the latest technological innovation in acoustical engineering.

The unique and exclusive Tannoy 15" (380mm) Dual Concentric™ drive unit incorporates an Alnico magnet system with an integral computer designed and manufactured reverse throat high frequency PepperPot WaveGuide™ for exceptional transient response and increased sensitivity. High frequency sound radiates from the centre of the low frequency unit through a carefully designed high frequency exponential horn. With the HF unit mounted behind and concentrically with the LF unit, low and high frequency sound radiation is generated on the same axis and is therefore fully integrated at source. A 'hard edge' cone surround and unique chassis earthing system deliver tight, fast and controlled bass with fluid and transparent midrange and high

frequency performance of great purity.

The crossovers are hard-wired throughout with 99.9999% purity 6N copper Acrolink® cable; the routing of which has been painstakingly considered to ensure there is no degradation in sound quality. Similarly, the exceptionally high quality components, such as Hovland Musicaps®, ICW Musicaps, Vishay thick film non-inductive resistors and very low loss iron core inductors, have all been carefully arranged to avoid any coupling effects.

Tannoy TD-12

The new Tannoy Dimension series incorporates the very latest wide bandwidth technology in an acoustically optimized cabinet. Operating between the roll-off point of the Tannoy Dual Concentric™ high frequency unit and 54kHz, the Dimension Super Tweeter will accurately reproduce the leading edge of individual notes, allowing the listener to experience the entire bandwidth information of instruments.

The Dimension series combines an innovative blend of beautiful styling and ground-breaking technical achievement – sound and science in perfect harmony.

At the heart of the TD12 is a 12" Tannoy Dual Concentric™ drive unit featuring a new cone material and twin-roll surround providing enhanced midrange performance and tight, fast bass with tremendous low frequency extension.

The cone material is manufactured from a composite of several different fibers. The mix of fibers has been carefully chosen to obtain a light but very stiff structure providing exceptional grip and control of bass transients.

Tannoy Eyris DC3 iDP

The Eyris iDP is a fully re-engineered Dual Concentric™ drive unit with an improved, ultra high performance SuperTweeter™, which is a key component within Tannoy's long-term development program of WideBand™ technology.

Tannoy's highly experienced engineering team having direct access to leading edge digital technology, has led to the development of Tannoy iDP™ (Interactive Digital Programming) Technology and its first application in the Eyris loudspeaker range.

Eyris iDP™ loudspeakers offer perfect matching to the listening environment through its built-in room equalization capability. Each loudspeaker can be individually optimized, taking into account its exact position within the room relative to the room boundary, and its own performance relative to the acoustic properties of the room. The primary features include:

- On-board digital processing and networking capability
- On-board bi-amplification with 300 Watts RMS to LF and 300 Watts RMS to HF
- Advanced technology software package for professional system installation
- Comprehensive user control of key functions and retrieval of installer pre-set parameters
- Compatibility with market-leading automated control systems.
- Dual Concentric™ and WideBand™ technologies
- Elegant, high rigidity cabinet design in a choice of three real wood finishes; sycamore, American walnut or black ash.

Providing the Eyris models with their natural voicing platform, the iDP™ system facilitates factory calibration of the bandwidth response of the individual speakers to within extremely tight tolerances, exceeding even the current exacting standards of the Pro monitoring industry.

Using the supplied installer software package, the installer is able to build on the factory defined voicing platform by optimizing the system to the acoustics of the installation environment. Tannoy iDP™ digital processing allows exact acoustic profiling of each speaker in the system, optimizing its performance relative to its location, whether that be in free space, close to wall, corner placement or in-wall. A system controller can then be configured with a range of bespoke pre-sets, personalized for the end user.

Eyris iDP™ is available as a complete home theatre package for professional installation. In its basic 5.1 configuration, the system comprises four active Eyris iDP™ DC3 floor standing loudspeakers and a DCC centre channel. Also included is a powerful 1.5 Kilowatt subwoofer with two side firing, 12" aluminum-coned drive units, and onboard iDP™ engine. The system, however, can be configured in any combination and number of DC3s, DCCs and subwoofers.

Summarizing the bespoke nature of the Eyris iDP™ system, Graham Hendry, Tannoy's Professional Engineering Director explained, "In a theatre, an installer would not just get the speakers out of the box, hang them around the auditorium and expect them to perform at their best. The installer would need to measure the performance of each speaker relative to its position and function within the theatre. For the first time ever, Eyris iDP™ allows the consumer to experience this same precise level of optimization in their own living room."

Increasingly, customers expect exceptional sound to accompany recent major advances in vision products. The highly versatile Tannoy Eyris iDP™ uniquely offers a complete solution in that it can be tailored precisely to the end users listening environment and personal audio preferences.

Mercury F4 Discrete Tower

Materials and components have been carefully selected to maximise the system performance and offer real acoustic benefits. Solid wood material for the cabinet construction, including a substantial 19mm MDF front baffle, provide the essential cabinet rigidity required of a good loudspeaker design. To cater for both modern and more traditional décor, all the models are offered in either an apple wood or dark oak vinyl veneer.

Price: \$ 365.00 Each
Tannoy Mercury F4

Mercury F3 Discrete Tower

The New Tannoy Mercury F range offers a choice of loudspeakers for home cinema or hi-fi applications of truly outstanding performance and value. The Mercury F line-up comprises two bookshelf models, two floor-standers, a centre channel and a rear effects loudspeaker. All Mercury F models are fully magnetically shielded to prevent color fringing effects when the speakers are placed close to a TV or monitor. Mercury F2, 3 and 4 are equipped with bi-wire terminals allowing additional system optimization.

Price: \$ 265.00 Ea
Tannoy Mercury F3

Mercury FC Center Channel

The Mercury FC Discrete Center Channel is optimally sound matched for the Mercury F series Tower and bookshelf Speakers. Used in a 5.1 configuration, this center channel matches frequency and output of the F-series Tannoy speakers.

Price: \$ 270.00 Each

IC6DC

IC6DC

The new Tannoy iC6 DC is a premium quality compact ceiling monitor system based around a new 6.5" (165mm) point source, constant directivity Dual Concentric™ transducer. Combining a long throw, multi fiber, paper pulp bass cone, the reference quality studio monitor driver also delivers extended bandwidth with its high frequency section that utilizes a 25-micron titanium dome and neodymium magnet system. The robust driver construction provides high power handling (110 Watts RMS) and the very wide bandwidth (36Hz - 36KHz) ensures exceptional intelligibility for music or speech.

CVS-6

The Tannoy CVS6 is a full bandwidth ceiling speaker system. The design comprises a 150mm (6.00") mid bass driver with a coaxially mounted 19mm (0.75") high frequency section mounted in a vented, injection moulded, paintable front baffle manufactured from UV/weather resistant UL94V-0 ABS material.

The mineral loaded polypropylene cone material and nitrile rubber surround enhance durability and long-term reliability. This compact unit is specifically designed for applications requiring the combination of excellent sonic quality for music and speech reinforcement and exceptional reliability.

Price: \$ 170.00 Each
CVS6

CVS-4

The Tannoy CVS4 is a full bandwidth ceiling speaker system comprising a 100mm (4.00") mid bass driver with a coaxially mounted 19mm (0.75") high frequency section mounted in a vented, injection molded, paintable front baffle. The mineral loaded polypropylene cone material and nitrile rubber surround enhance durability and long-term reliability. This compact unit is specifically designed for all applications requiring the combination of excellent sonic quality for music and speech reinforcement and exceptional reliability.

CMS6 ICTB

The Tannoy CMS6 ICTB has been specifically designed for applications where there are space limitations in the ceiling void. Featuring a high power 6.5" point source ICT™ driver, this product does not compromise sound quality for smaller insertion depth – indeed this driver design optimizes audio performance and reliability by the use of unique driver construction technology.

Price: \$145.00 Each
CMS6ICTB

Price: \$ 414.00 Each
CMS401DC

CMS401DCe

The Tannoy CMS401 DCe is a full bandwidth ceiling monitor system suited to high-level music and speech reinforcement applications requiring exceptional sonic quality with uncompromised reliability. The CMS401 DCe features Tannoy's exclusive point source Dual Concentric™ driver. The mid-bass and tweeter sections are coincidentally aligned to a true point source; ensuring a wide and controlled dispersion for optimum coverage; this while avoiding the massive loss of energy, in the vertical plane at the crossover frequency, inherent in two-way discreet designs.

IW62TDC

IW62TDC

Constructed around a larger version of the rigid low profile baffle design, this model utilises an additional bass unit along with the same Dual Concentric™ and SuperTweeter™ driver array used in the iw6 TDC. The increase in bass performance and power handling capability make this the ideal choice for more demanding audio systems, while the simple to use 8-way clamp mechanism ensures installation security. Quick and easy to use, the gold plated spring loaded terminals are provided with bi-wire and driver earthing options. The iw62 TDC is the premium discreet install solution for a wide range of distributed audio systems where optimum acoustic performance is essential.

Price: \$ 619.00 Each
IW62 In-Wall Subwoofer

IW62TS In-Wall Subwoofer

The iw62 TS is a high performance in-wall subwoofer designed to complement the Tannoy in-wall full range loudspeakers by augmenting their low frequency output. With a continuous power output rated at 200W RMS, this in-wall subwoofer is capable of delivering impressive results in large residential and commercial applications; such as small entertainment venues, restaurants, bars, public buildings, board rooms and business music systems.

IW6TDC

The Dual Concentric™, a time coherent, point source and constant directivity dispersion driver design, is an ideal solution for the in-wall speaker application. The high frequency unit, centrally mounted in the throat of the main mid/bass driver, delivers an open and natural sound with a very wide imaging 'sweet spot'. The addition of a Tannoy SuperTweeter™ extends the frequency bandwidth to over 50kHz for greater precision, tighter imaging and increased presence throughout the entire audible frequency band.

Price: \$ 479.00 Each
IW6TDC

IW6DS

A two-way design capable of high power delivery, tremendous bass output and great subtlety and finesse throughout the entire frequency range. The immensely strong chassis of the bass/mid-range drive unit controls the energy created by it's long throw driver with ease, a crucial factor in delivering real performance quality, while the inclusion of the Tannoy WideBand™ high frequency unit extends the bandwidth over 50 kHz. A robust gold plated termination block enables quick and secure connection while the unique six-point clamp mechanism makes secure installation a simple task.

Price: \$ 265.00 Each
IW6DS

IW4DC

The Tannoy iw4 DC is a full bandwidth in wall speaker system. The 100mm (4.00") Tannoy Dual Concentric™ is a point source, constant directivity drive unit design comprising a multi fibre paper pulp mid bass cone and a 19mm (0.75") ferrofluid cooled, titanium dome HF unit with neodymium magnet system. The driver and passive frequency dividing network is mounted in an injection moulded, paintable front baffle manufactured from UV/weather resistant UL94V-0 ABS material.

1,600 ANSI Lumens, 4000 : 1 Contrast, 1280 x 720 Pixels

Digital Projection's single-lamp TITAN HD-250 employs the latest in dark metal, 3-chip DLP™ technology to produce 1600 lumens and 4000:1 contrast. Compact, robustly built and ultra-quiet for its performance class, the TITAN's 7 standard inputs accept nearly all video and computer formats, including HD-SDI and HDCP compliant DVI. Pixel based motion adaptive interpolation, minimal frame delay, and lamp life up to 1500 hours make the TITAN HD-250 an ultimate display for elite home cinema installations.

DVision 1080P VIP

Digital Projection's new dVision 1080p features cutting edge DLP display technology utilizing a .95" DarkChip3™ DMD for native 1920 x 1080 resolution. Dual seven-segment color wheels produce a user adjustable 500-2500 ANSI lumens and 6000:1 contrast. Connectivity to input devices is provided via Digital Projection's [VIP 1000](#), an external video processor featuring the Realta integrated circuit from Silicon Optix. Among other capabilities, the [VIP 1000](#) employs true 1080i to 1080p de-interlacing, HQV video enhancement, dynamic noise reduction, adaptive scaling and 10 bit processing, all tailored to optimize the performance of every source presented to the dVision 1080p display.

PD7010

This projector's 2500:1 contrast, 1,000 lumens, and native 720p HD resolution, completes a trifecta not often seen for the price. Embellished further with wide-ranging connectivity, DLP's DarkChip technology, and intuitive menus, this projector was designed as much for your wallet as it was your home theater experience. Cynics take note: performance and price can peacefully coexist.

***PD7130 is Pictured

Price: \$ 2,999.00

PD7060

PD 7060

A 3500:1 contrast ratio, 1,000 lumens, and a native 720p HD resolution, the Planar PD7060 endows every projected image with a lush, detailed realism. Now augment this awe-inspiring performance with wide-ranging connectivity, DLP's DarkChip technology, and menus that can virtually read your mind. Be warned: This projector has been known to turn enthusiasts into addicts.

***PD7130 is Pictured

PD 7130

With a 4500:1 contrast ratio, 1000 lumens, and native 720p HD resolution, this projector will make your eyes dilate and your heart race. Especially when you factor in the integrator-friendly features, such as horizontal and vertical lens shift, DLP's DarkChip technology, ample connectivity, and menus that don't require an engineering degree. Up until this projector, the wow factor had never officially been located.

Price: \$ 3,999.00

PD7150

PD 7150

When a 5000:1 contrast ratio unites with 1000 radiant lumens, two things are bound to happen. Friends will covet. And friends will ultimately have to be reminded to leave. It's all because of 921,600 pixels at native 720p, integrator-friendly features such as horizontal and vertical lens shift, DLP's DarkChip technology, and a girth of connectivity options. Warning: Standing in awe is about to become an obsession.

Cinema Seat Models

AV-1 Inc is proud to offer its custom theater seating collection. Prices will vary depending on fabric/leather grade, arms, model, and quantity. Prices start at \$1810 per seat

Metropolis

This new seating model offers uncompromised comfort utilizing state of the art lumbar support and features an ergonomically engineered arm design for better comfort in a reclined position.

Dapprima Luna

This European style features an orthopedically engineered headrest to provide premium comfort during hours of theatrical entertainment.

Carina Deco

This deco inspired offering presents classic styling while remaining understated. Embellishments available upon request.

Barrington

This timeless design harkens back to an age of simplicity. With stately engineered armrests, our Barrington chair offers the ultimate in luxury.

Palace

The Palace is our answer to the client looking for a traditional Theater Seat. This seat features unique stitching in the backrest, seat and foot rest adding to its classic look and feel. The Palace combines comfort and traditional styling to make this chair perfect for almost any theater environment

Avalon We created the Avalon with the true cinema enthusiast in mind. The unique, built-in, headrest and contemporary styling makes this chair perfect for the client who wants dramatic lines combined with incredible comfort.

Rialto

The Rialto Theater Seat combines comfort with classic theater styling. The Rialto's sophisticated styling and extraordinary comfort has made it one of our most popular chairs.

Cosmopolitan

The Cosmopolitan's classic seat, footrest and plush slightly concave backrest, are the perfect pairing with the contemporary, stylized arm rests. Each unique curved armrest is finished with exposed front feet, with an overall combined effect that is as incredible to look at as it is to sit in.
